Telemedicine powered by:

## What is telemedicine?

Telemedicine is the use of audio and video technology to provide care the patients at a distance.

## What are the benefits?

There are many benefits to using telemedicine. The biggest, is the opportunity to meet with your provider from the comfort of your home or office. This saves you time and money traveling to the clinic.

Also, you avoid catching germs from other sick patients in the waiting room. Avoid germs

## Is it easy?

We use Doxy.me, a simple and secure telemedicine solution, to provide telemedicine. It was expertly designed to be as easy as possible.

*I can't believe how easy it was to meet with my provider. I am in my late 70s and not very technically savvy. **Doxy.me** was extremely easy to use. It was amazing not to have to drive anywhere*

**Hilda Schultz**

Patient

## Is it secure?

**Doxy.me** uses state of the art security and encryption protocols so that complies with HIPAA and HITECH requirements. No data is ever recorded or stored.

Your provider will start the visit when they are ready. Use headphones when possible.

## Problems or questions?

If you run into any issues, try restarting your computer. If you have other issues, check out **help.doxy.me**

or email **support@doxy.me**
