Vetted by Business Interests	Yes +		
Comprehensive Approval Process	Yes	Partially	No
Supported by Rational Basis	Yes	Questionable	Questionable
Protects Vested Property Rights	Yes	Yes	No
Protects Black Neighborhoods ¹	Yes	Yes	Yes

¹ This is a misleading category. As MLGW's water lab reported all citizens obtain drinking water from the same public water system; thus, any impact on that system will affect all races equally. There has been no evidence presented in this record to show that property values are affected by the existence of the myriads of pipelines already existing throughout Memphis. Thus far all that has been presented is the arguments from anti-pipeline advocates; it is well established that advocacy arguments are not evidence. Also, data provided by anti-pipeline advocates show that many non-crude pipelines are far more dangerous to residential neighborhoods than oil pipelines.
