

**CITY OF MEMPHIS**

**REQUEST FOR QUALIFICATIONS**

**#52108-2**

**Low Voltage and Inside Fiber Optic e-Cabling**

**Addendum #1**

---

The following information is provided as an update to RFQ 52108-2. For any discrepancies in this addendum and RFQ 52108-2, the language in this addendum takes precedence.

Due to the large quantity of City projects that require low voltage and inside fiber optic e-cabling, a vendor pool of qualified e-cabling installers is being created. Qualified vendors that respond to the RFQ will be awarded a contract. A specific number of projects for each qualifying vendor is not guaranteed. Specific projects will be awarded to the vendor that the City deems, in its sole discretion, best meets the needs of the City. Determining factors in matching vendors to specific projects will include, but are not limited to:

- Vendor ability to begin and complete the project in the given timeframe.
- City satisfaction of performance on prior projects.
- Are there any current projects with the vendor that are behind schedule?
- Familiarity of related projects (i.e. if modification or updating existing cabling is needed, the City may select the vendor that performed the original project).

For each project the City will calculate a pre-determined project cost. After a vendor has been selected for a specific job/project, any additional costs proposed by the selected vendor must be agreed to by the City prior to beginning the work. If project pricing cannot be agreed upon, the City will have the option to select a different vendor for the project.
